DETAILED ACTION

Oath/Declaration

1. An executed Declaration and Power of Attorney was received on 19 April 2005.

Other Submissions on April 19, 2005

2. Also received on 19 April 2005 was a specification, claims and drawings. The applicant's intent in submitting the documents is not clear.

A). There does not appear to be a statement that a specification is being submitted or that the specification is to be regarded as a "substitute specification"; nor is there the required statement that the specification contains no new matter. In view of these deficiencies, the originally filed specification was used in the examination of this application.

B). There does not appear to be a statement that new claims are being submitted; nor do the claims contain a statement that they are to be regarded as "replacement claims". The original claims were used in the examination of this application.

C). Again, there is not statement that new or replacement drawing are being submitted. The original drawings were used in the examination of this application.

Preliminary Amendments

3. Preliminary Amendments were received on 24 December 2003 and 19 April 2004.

Information Disclosure Statement

4. An Information Disclosure Statement was received on 19 April 2004. All the documents were reviewed. The non – English documents were reviewed to the extent of what could be determined from the diagrams or figures.

Allowable Subject Matter

5. Claims 1 – 38 are allowed.
6. The following is an examiner's statement of reasons for allowance:

The prior art discloses making lenses for a projection exposure apparatus using a 193 nm wavelength and using fused silica and certain quantities or content of hydrogen and OH. The prior art does not disclose at least lenses having a design fluence that meets the transition point (T_{RC}) in the relationship claimed, nor a transmittance (T) that obeys the relationship claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2851

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references disclose lens having a particular content of OH and hydrogen in a fused silica for use with a particular wavelength and energy density.
